

Contents

A comparative study between two numerical solutions of the Navier-Stokes equations <i>M. Alemi and R. Maia</i>	1
Influence of heat generation on the phase transformations and impact responses of composite plates with embedded SMA wires <i>A. Niknami and M. Shariyat</i>	13
Chemical reaction and thermal radiation effects on MHD micropolar fluid past a stretching sheet embedded in a non-darcian porous medium <i>L. Ramamohan Reddy, M. C. Raju, G. S. S. Raju and S. M. Ibrahim</i>	27
Prediction of earing in deep drawing of anisotropic aluminum alloy sheet using BBC2003 yield criterion <i>S. Izadpanah, S. H. Ghaderi and M. Gerdooei</i>	47
Assessment of different methods for fatigue life prediction of steel in rotating bending and axial loading <i>J. Amirian, H. Safari, M. Shirani, M. Moradi and S. Shabani</i>	57
Water hammer simulation by explicit central finite difference methods in staggered grids <i>F. Khalighi, A. Ahmadi and A. Keramat</i>	69
Dynamical formation control of wheeled mobile robots based on fuzzy logic <i>K. Alipour, M. Ghiasvand and B. Tarvirdizadeh</i>	79
An efficient finite difference time domain algorithm for band structure calculations of Phononic crystal <i>M. Moradi and M. Bagheri Nouri</i>	93
Vibration analysis of functionally graded cylindrical shells with different boundary conditions subjected to thermal loads <i>M. Talebitooti, M. Ghasemi, S. M. Hosseini</i>	103
Enhancing the low cycle fatigue strength of AA6061 aluminum alloy by using the optimized combination of ECAP and precipitation hardening <i>M. Jooybari, J. Shahbazi Karami and M. Sheikhi</i>	115
